

ALEENA ANTONY

Strategy & Operations | Data Analytics

+91 8078552885

vat.aleena19@gmail.com

Kerala, India | Open to relocate

PROFESSIONAL SUMMARY

Analytically driven Master's candidate in Data Analytics with a background in Physics research, cross-functional collaboration, and AI-powered problem solving. Proven ability to distil complex datasets into clear insights and compelling narratives. Hands-on experience with Python, SQL, data visualisation, and AI tools - combined with strong communication skills developed through teaching, research, and design work. Eager to bring structured thinking, proactive drive, and a curiosity for AI-augmented operations to Cisco's Collaboration Devices Chief of Staff team.

EDUCATION

MSc. Data Analytics | Digital University of Kerala | 2025 – 2027 (Ongoing)

- Coursework spanning statistical modelling, machine learning, data engineering, and business intelligence.
- Actively experimenting with agentic AI workflows and Python-based automation as part of curriculum projects.

MSc. Physics | Aquinas College, Edacochin (MG University) | 2022 – 2024 | 71%

- Developed strong quantitative reasoning and comfort with ambiguous, data-rich problems.

BSc. Physics | Aquinas College, Edacochin (MG University) | 2019 – 2022 | 80.33%

- Final-year project: Spectral classification of 20+ stars using SDSS data and Wein's Displacement Law - independently managed data collection, analysis, and reporting.

KEY SKILLS

Data & Analytics

Python · SQL · PostgreSQL · Statistical Modelling

AI & Automation

Agentic workflows · Prompt engineering · AI-assisted productivity

Communication

Executive presentations · Structured reporting · Cross-functional collaboration

Productivity

MS PowerPoint (advanced) · GitHub · VS Code

RESEARCH & PROJECT EXPERIENCE

Reservoir Computing | MSc Research | 2026

- *Designed and implemented an NGRC-based machine learning model for basin reconstruction and unseen attractor prediction in nonlinear dynamical systems. Performed comparative analysis with Echo State Networks (ESNs) using Accuracy, IoU, and KL divergence metrics.*

Unsupervised ML for Magnetosphere Region Identification | MSc Research | 2026

- Applied unsupervised machine learning models to classify magnetosphere regions, independently managing data pipeline, model selection, and results documentation.
- Built skills in working with large, unstructured datasets and translating findings into structured

research reports.

AI-Powered GIS Platform for PM-AJAY Scheme | Academic Project | 2025

- Designed a centralised, AI-driven GIS platform to visualise and manage multi-agency programme data, translating complex government operational data into actionable dashboards.
- Demonstrated ability to bridge analytics and stakeholder communication — directly relevant to data-driven storytelling for executive audiences.

Stellar Spectral Classification - SDSS Data | BSc Final Year Project | 2022

- Collected, cleaned, and analysed spectra for 20+ stars; produced a comprehensive project report presented to faculty panel.
- Demonstrated self-directed research capability and ability to synthesise quantitative findings into clear narratives.

WORK EXPERIENCE

Physics & Mathematics Tutor | Freelance | 2023 – 2024

- Delivered personalised instruction to undergraduate students (in-person and online), simplifying complex concepts and adapting teaching approach to individual needs.
- Planned structured lesson content and tracked student progress - paralleling operational planning and performance monitoring skills required in the Chief of Staff function.
- Developed strong stakeholder communication and time management across concurrent student engagements.

Brand Designer | Freelance | 2024 – Present

- Created brand identities, ad posters, and visual storytelling assets for clients, managing end-to-end project delivery independently.
- Produced high-quality presentation-grade visuals - directly applicable to executive deck creation in a fast-paced environment.
- Managed client communication, scope, and deadlines while maintaining brand consistency.

CERTIFICATIONS & TRAINING

- | | |
|--|--|
| ✓ Containers, Docker, Kubernetes & OpenShift - IBM | ✓ Database Design & SQL in PostgreSQL - Univ. of Michigan |
| ✓ Google Cloud Career Launchpad Data Analytics track | ✓ Kafka Fundamentals - LearnkartS |
| ✓ Getting Started with Git and GitHub -IBM | ✓ Data Modelling Essentials |
| ✓ NCC – Army Wing C Certificate (2022): | ✓ Research & Publication Ethics - Ministry of Education India (2023) |

ADDITIONAL

- NCC – Army Wing C Certificate (2022): demonstrated discipline, leadership, and teamwork in a structured institutional environment.
- Languages: English (professional fluency), Malayalam (native), Hindi (conversational).
- Typing speed: 55 WPM; strong documentation and reporting throughput.
- Attended IIA Summer School, IIRS Satellite Meteorology, and multiple advanced workshops : reflects self-driven continuous learning mindset.
